SUMMARY

Computer Science Engineering student with strong expertise in software development, data analysis, and problem-solving. Experienced in building real-world applications, machine learning systems, and contributing to technical communities. Passionate about developing scalable and user-centric solutions.

EDUCATION

Vellore Institute of Technology
B.Tech in Computer Engineering

Vellore, Tamil Nadu, India
2024 – 2028

EXPERIENCE

Mozilla Firefox Club VIT
General Operations Head

Vellore, India
Jan 2026 – Present

- Led operations and organized technical events, improving community engagement across student teams.
- Managed cross-functional teams and optimized execution workflows for club activities.

Cognifyz Technologies
Web Developer Intern

Remote
Oct 2025 – Nov 2025

- Developed responsive web interfaces and enhanced user experience across multiple product pages.
- Collaborated on frontend optimization and feature implementation with the engineering team.

Kivenetics
Machine Learning Intern

Remote
2025

- Developed and trained machine learning models to solve real-world business problems using Python and scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Collaborated with the engineering team to integrate ML pipelines into production-ready workflows.

PROJECTS

Automatic Locking Device | *Embedded Systems, Automation* | [GitHub](#)

- Designed an automated security system using embedded logic for real-time access control.
- Implemented real-time control and system automation pipelines for reliable operation.

Emotion Detecting System | *Python, scikit-learn, NumPy* | [GitHub](#)

- Built a machine learning model to detect human emotions from input data using classification techniques.
- Applied data preprocessing, feature engineering, and model evaluation using scikit-learn.

CatchIt | *Python, Pygame, Matplotlib* | [GitHub](#)

- Developed an interactive game application using Pygame with focus on performance and usability.
- Designed clean UI and optimized responsiveness; visualized game metrics using Matplotlib.

Music Player Application | *Python, PyAudio* | [GitHub](#)

- Built a music player with playback controls and intuitive UI using PyAudio for audio streaming.
- Implemented features including play, pause, and track navigation with clean audio management.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, SQL

ML & Data Science: scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Audio & Graphics: PyAudio, Pygame

Databases: MySQL, SQLite, MongoDB

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Responsive Design

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Machine Learning, Data Analysis, Database Design, REST APIs

CERTIFICATIONS

Deloitte Australia – Data Analytics Job Simulation (Forage)
Accenture Australia – Technology Consulting Job Simulation (Forage)
Lloyds Banking Group – Data Science Job Simulation (Forage)
J.P. Morgan – Software Engineering Job Simulation (Forage)

PUBLICATIONS

Click, Vote, Secure: The Blockchain Election | [Medium Article](#)

- Published article exploring blockchain-based secure voting systems and their real-world feasibility.
- Discussed decentralization, transparency, and cryptographic security in modern elections.
